

AiLibrary, Inc. is a collection of local and remote (Internet based) applications that work together to form a Artificially Digital Library. The information is stored on the users MAC/PC/PDA and is INDEXED automatically by BookBot's(tm) and the associated INDEXES are located on the USER's AiLibrary WEBSITE. The USER's AiLibrary WEBSITE has thumbnails and short VIDEO clips to allow the USER to VISUALLY identify the item that they actually want to display on their local device.
